PERSONAL PROFILE

I have a graphic design background and my creativity through design has led me to a career change into full stack web development. My most recent experiences have been in startup environments, loaded with tight deadlines and multiple responsibilities. As a developer I'm always looking to learn and implement new methods or new approaches to any problem.

SKILLS

- HTML, CSS, Javascript, Python
- ReactJS, Redux, NodeJS, Express.js
- GraphQL, Apollo, Prisma
- Adobe Suite, Premiere, After Effects, Adobe XD, Lightroom

EDUCATION

LAMBDA SCHOOL
Full–stack Web Development | 2019
- Lambda School's full–stack web dev course is 9+ months of Front–end, Back–end and Computer Science. The program is 100% remote using large video conference lectures. Slack was our communication for cohort and team lead group structures.

UC SAN DIEGO EXTENSION
Digital Content Creation | 2019
- Created content for a variety of platforms
- Learned how to plan and create content for high–impact campaigns
- Introduced to Content Management Systems (CMS)
- Learned photography and motion graphics to enhance content.

WORK EXPERIENCE

FREELANCE GRAPHIC DESIGNER
Self–Employed | 2018 – Present
- Advise clients on the best strategies to use for their particular products and desired audiences.
- Create unique images, video post edits, illustrations, and logos for customers.

GRAPHIC DESIGNER
ReviewBuzz | 2014 – 2017
- Stored, retrieved, and manipulated data
- Modified existing software to correct errors and optimize efficiency
- Prepared detailed reports

PROJECTS

QUALITY–HUB RESUMEQ
Project Link | Code | Dec 2019 – Feb 2020
React | Apollo | Node | Express | GraphQL
Description: A micro–service of Quality Hub that allows users to search through a marketplace of qualified resume coaches and request a review of their resume.

- Migrated database to PostgresSQL for data persistence
- Connected ResumeQ backend with Core and InterviewQ in Apollo Federation
- Implemented CRUD functionality with tables
- Maintained consistent styling from previous designs of Quality Hub

KIT 10 STORE
Project Link | Code | June 2020
React | Bootstrap | Styled–Components
Description: Kit 10 is a e–commerce site with retro sports gear. Users can select to add items to their cart, erase or add more items to purchase.

- Built a Carousel with Bootstrap
- Applied Context API for storing data
- Styled application with Styled–Components and Bootstrap
- React JS using hooks

BARCA–MEMORY GAME
Project Link | Code | Oct 2019
JS | HTML | CSS
Description: The memory game is a basic matching game. In a deck of paired cards, the player needs to match each pair to win the game.

- Applied JS fundamentals for game logic.
- Animations were done with CSS3
- 3D tilt effect done with JS library Vanilla–tilt
